

Design Task: BrainStrata Dashboard

Preface

Please visit the BrainStrata platform to familiarise yourself with the product and its current experience before beginning this task.

This is a **full-time role** in which you will work closely with the frontend team to design and ship product features. This task reflects the type of work you will be responsible for in the role.

Task

Design a **Dashboard (one page only)** for BrainStrata.

<https://brainstrata.com>

The objective is to create a dashboard that is clear, well-structured, and visually cohesive, with a strong and consistent design language.

Requirements

1. User Orientation

The dashboard should clearly communicate:

- The user's current learning context
- Their progress
- Their position within the product

2. Primary Action

The design should guide the user towards a clear next step, such as:

- Continuing a course
- Resuming learning
- Following a recommended action

3. Content Structure

Include:

- Ongoing courses
- Progress indicators
- Recently accessed content

4. Design Language

Demonstrate:

- Strong layout and spacing
- Clear visual hierarchy
- Consistent use of components (e.g. cards, buttons, typography)
- Cohesive styling across the page

Constraints

- One page only (desktop)
- No additional flows or pages
- Design for short, focused user sessions

Deliverables

- One Figma frame (dashboard)
- Optional annotations (maximum 4–5 notes)

Evaluation Criteria

- Clarity and structure
- Visual hierarchy and layout
- Consistency of design language
- Practicality and usability of the design
- Overall quality and attention to detail

Please complete this task independently without requesting additional guidance. The objective is to assess your individual approach, decision-making, and how you structure and execute design work.

Deadline: 5 days from receipt of task on internshala
